VOL. XXIX, No. 1

DIDSBURY, ALBERTA, THURSDAY, APRIL 28, 1932

\$2.00 per Year, 5 cents a copy

The Snowstorm

The snowstorm which started on Wednesday morning of last week proved to be the worst snowstorm since 1919. The snow piled in great drifts and the roads were closed to all traffic for several days.

Saturday noon the snow plow arrived in town from Red Deer, followed by about thirty cars and trucks. The plow managed to reach Calgary about three o'clock Sunday morning.

Although the snow has caused a lot of inconvenience, there are no complaints heard, as all realize that the moisture received will give a splendid start to all crops.

It is estimated that about 30 per cent of the wheat seeding has been done. The balance of the seeding will probably be delayed two weeks, but with the abundant moisture at hand the farmers are not worrying.

W.C.T.U. Annual Convention Zion Ev. Church, May 3 and 4

The Central Alberta District of the W.C.T.U. will hold their twentieth annual convention in Zion Evangelical Church, Didsbury on Tuesday and Wednesday May 3rd and 4th.

The opening session will commence on Tuesday at 2 p.m. There will be an evening meeting at 8 o'clock, when a program will be given, including a pageant by the young people. In addition to this, the provincial president, Mrs. Wm. White, of Nanton will address the meeting.

On Wednesday the morning session will commence at 10 o'clock and the afternoon session at 2 o'clock.

Every local member is urged to attend all the sessions and a cordial invitation is extended to visitors.

Many Highways Closed To All Heavy Vehicles

Orders of the department of public works suspending truck and bus traffic on main highways of the province until May 7, owing to the softened condition of the roads, were explained to the Herald by long distance telephone from government officials at Edmonton Monday afternoon.

These orders, in southern Alberta, apply to the following highways: Calgary-Nanton; Midnapore-Timber Valley; Calgary-Edmonton; Calgary-Bassano; Calgary-Almonst; Drumheller-Wayne; Lacombe-Stettler and Beiseker-Three Hills.

Federal Commission To Control Radio

In a first page story Monday the Montreal Gazette said, in part:

"Government control of radio through a special federal commission appointed for the purpose, and the retention of private enterprise through a system of ten-year leases to a large number of broadcasting stations in various parts of the country, are believed to be the broad lines on which the parliamentary broadcasting committee will recommend that Canada should proceed in this matter in the future."

Reliable information to this effect was obtained in Montreal over weekend and it is understood that an official announcement will be made from Ottawa shortly.

"The report to be handed down by the parliamentary broadcasting committee is believed to involve a plan retaining features of both our schemes that divide public opinion on the question of radio control, i.e. private enterprise as in the United States, and government control as practised in England."

LOCAL & GENERAL

Miss M. Saugstead was a Calgary visitor Saturday.

Mr. H. O. Tonjman made a business trip to Calgary Monday.

C. H. Adeshead made a business trip to Calgary Tuesday.

Mr. Ken Robinson, of the Royal Bank at Cardston was renewing acquaintances here this week.

Mr. Cecil Studer, of Lethbridge has been visiting his parents, Mr. and Mrs. A. G. Studer this week.

Mrs. W. Derby and her mother, of Medicine Hat were visitors with Mr. and Mrs. Hilliard last week.

Mr. Walter McCoy who is working south of Calgary, spent the weekend at his home here.

Mr. and Mrs. Hugh Lee were weekend visitors to the southern city.

Mr. C. F. Dooley who has now changed Precision Foundry & Machine Co., of Calgary, was in town on Monday winding up his affairs here.

Mr. Frank Moyle, who has been attending the University of Alberta, returned home for the summer vacation on Saturday.

Johnny Johnson, who was married in Calgary with the Cathlins, truck last week, managed to get his truck home on Sunday.

Mr. G. McKenzie-Grieve who has been spending his vacation in Victoria returned to his duties at the Royal Bank on Monday.

Mr. Jack Cathlins, of Tisdale arrived in town this week. He will take charge of the day line for his brother, Mr. Jim Cathlins.

Mrs. Bailey and her granddaughter, of Cochrane visited last week with her daughter, Mrs. J. Russell. Mrs. Allen, of Cochrane was also a visitor.

Mr. Harold Chomeng, of Edmonton has been appointed manager of the sporting goods department of the Motor Car Supply Co.'s branch in that city.

Mrs. A. J. Mitchell who accompanied Mr. Mitchell to Calgary, returned home last Thursday. From the latest report Mr. Mitchell is progressing very favorably and hopes to return home shortly.

Mr. El. Shand has accompanied a number of Calgary men to the Cariboo country of British Columbia to open up gold-mining claims. Mr. W. A. Teskey is interested in the proposition.

It is reported that the road from here to Calgary, south of Crossfield is closed to all traffic. Motorists intending to go to the city Tuesday evening were turned back at Crossfield.

The danger to upland game birds by reason of the storm is reported to be less than first feared. Ruffed grouse, prairie chicken, Hungarian partridge and pheasants had a miserable week, but observers state they will come through pretty well. Waterfowl found conditions much to their liking.

WEDDING BELLS.

DYCK-SHERICK

A beautiful wedding was solemnized in the Mennonite Church at Didsbury, Alberta, on Thursday, April 14th, 1932, when Mr. Peter Dyck and Miss Laura Mildred Sherick, both of Didsbury, were united in marriage by Rev. A. Traub in the presence of a large number of relatives and friends.

Miss Mabel Shultz played the Wedding March; Miss Edith Sherick, sister of the bride, was bridesmaid and Mr. Lester Stauffer acted as best man, while Harley Traub and Emerson Stauffer were the ushers.

After the ceremony the bridal party and nearest friends retired to the home of the bride's parents, Mr. and Mrs. E. Sherick, where dinner was copiously served. During the afternoon a very pleasant time was enjoyed by the guests in music and singing.

Upon their return from a short honeymoon in Calgary, Mr. and Mrs. Dyck left for Markham, near Guster, where Mr. Dyck will take up pastoral duties in the Mennonite Church assigned him at the recent conference.

Their many friends wish them well and follow them with their prayers for success in their new sphere of service and labors of love.

Rain and Snowfall Of Tremendous Value

The favorable effects of the rain, sleet and snow on farming conditions in Alberta cannot be over-estimated. Agricultural experts informed the press Monday.

"Just what we need," was the terse comment of Gordon Stewart, head of the dominion seed branch. "What already seeded will not be injured, and farmers need not worry over that which is still to be seeded. For germination will be rapid and there will be an invaluable reserve of moisture."

S. G. Porter, head of the C.P.R. department of natural resources, expressed the same view. The good soaking, having regard to the porosity of the soil and capillary action, factors which tended to operate against the retention of moisture in the soil, would be counteracted to some extent as the water had a good chance to penetrate, in some instances well beyond the ordinary crop root depth. Moisture will gather in low places in fields and its distribution will be lateral as well as vertical.

Dr. I. H. Mather, agricultural chemist of Consolidated Smelters, also said the present moisture would have tremendous value, since it would go into the soil beyond the seed level, regardless of the condition of the soil.

Ranton's Anniversary Sale Saturday

Cockshutt Building, Big Blaze, Calgary

The Cockshutt Building, one of Calgary's earliest business structures is a total loss.

Tuesday evening, flames ripped through the interior, destroying every inflammable thing that came in their path. Wiling efforts by firemen confined the blaze to the building at 212 Ninth Avenue West, and the total loss to some extent between \$150,000 and \$200,000. Earlier estimates placed the loss even higher, but survey following the fire indicated that some of the valuable machinery in the building might be salvaged. The blaze was under control at 9 p.m.

The Dunlop Tire & Rubber Co. were the heaviest losers. It was estimated that losses of the company would total \$75,000. Damage to stock and equipment of L. W. Caldwell & Co., garment manufacturers, was estimated to be in the neighborhood of \$25,000.

Officials of the Jeffrey Manufacturing Co. set the possible loss of the company at \$5,000.

Loss suffered by the United Grain Growers Ltd. was not estimated. The building was valued at \$50,000 and the loss was largely covered by insurance.

Dramatically sudden was the appearance of the blaze. Officials of two of the firms which occupied the structure were just preparing to go home when smoke betrayed the presence of the danger. How the fire started was not ascertained definitely Tuesday evening. It was believed that flames shot up the elevator shaft to turn the building into a blazing inferno within a few minutes.

Joint Meeting Postponed

On account of the bad roads the joint meeting of the three local units of the U.F.A., which was to have taken place in the Community Hall last Monday evening, was postponed until next Monday evening, May 2nd. Mr. Norman Priestley, Vice-President of the U.F.A. will be the speaker.

Livestock Loss From Storm Reported Light

Loss to grown livestock, as a result of the storm, will be negligible as a survey of ranches in the foothills country and to the east reveals. Inquiry, embracing a series of ranches from Didsbury south to the Crow's nest, indicated that the only loss was the among snow-buried calves, which arriving in wet, cold weather, were subject to pneumonia, but even in this respect the loss would be scarcely more than normal.

We Are Learning Now

It is not in times of prosperity but in adversity that people learn their most valuable lessons. They may not be accumulating immediate and material profits, but they do unquestionably profit, reaping the benefits throughout the years to follow.

And what is true of individuals is equally true of nations and of the world. When things are moving along quite satisfactorily for the time being, normal or even abnormal developments taking place and progress recorded, when people are content and satisfied, individuals and nations learn very little of the real meaning and vital things of human existence. It is not in times of prosperity that great reforms are achieved and marked advances made in human and social relationships, rather it is when we consider "all is well" that we slip back and lose our grip on real fundamentals.

In the months and years immediately preceding the great stock market crash in the latter part of 1929, few people were worrying about anything, unless it was how to make still more money than was accumulating to their credit. They were not at all concerned about existing social conditions and giving no thought, or very little, to vital principles underlying all economic problems, including the possibility of future unemployment, mounting personal and national debts, heavier taxation, all combining to possibly result in loss of businesses and homes.

We find governmental bodies and special parliamentary committees grappling with the many and intricate problems involved in the relationships existing between debtors on the one hand and creditors on the other. They are discovering that, in the pale days of abounding prosperity, when people took little thought of the future, when money and credit were easy, when production was booming, markets plentiful and prices high, a huge volume of debt, in large and small amounts, was contracted which it is now utterly impossible to pay, and which now rests like a wet blanket upon all business, industry and means of production. Efforts are being directed to finding a way out of the morass in which people and nations are sinking, and to provide checks to a recurrence of such a condition when once again the world becomes thoughtless through prosperity.

A Royal Commission is studying the transportation problem. A few years ago the railways of Canada were doing an enormous business, rapidly expanding their systems, the privately-owned road paying large dividends with their stock quoted at a premium, and the government-owned road steadily, even rapidly, through re-organization and efficient management, increasing its profits on operation to such an extent as to give promise that the day was at hand when it would no longer be a drag on the Federal Treasury. But now both systems are in deep financial trouble, and a solution of their difficulties is sought. In adversity they, and the country, are learning lessons they seemed to study when prosperous only a few short years ago.

Had a sound system of unemployment insurance been established during the years of our prosperity, thousands of people and the country itself would have been saved much of the grief of the past two years. But when times were prosperous, everybody employed at good wages, business boomed, then could not have mustered a corporate guard. It would have been, nobody was in a mood to even consider the possibility of future unemployment on a gigantic scale. Support for a scheme of unemployment insurance then could not have mustered a corporate guard. It would have been laughed to scorn. But now, in adversity, we are learning the lesson that Joseph of old taught the ancient Egyptians, in years of plenty prepare for years of famine.

For a goodly number of years past, the need for a thorough over-hauling of Canada's constitution, the B.N.A. Act, has been manifest. A splendid document in 1867, its designers could not foresee an age in which radio and the airplane would wipe out provincial boundaries in the twinkling of an eye, nor could they vision this electrical age, this mechanical age with its myriads of inventions and mass production on farms as well as in factories. A nation itself could control radio, let alone a province. The other waves recognize no arbitrary boundary lines. If Canada and the United States each attempted a radio policy independent and regardless of the other, only chaos would result. Yet some provinces desire to control both the radio and airplanes within their smaller borders.

Recently the Privy Council declared the Dominion Insurance Act unconstitutional, and that control of insurance rested with the provinces, under the terms of the B.N.A. Act. Yet insurance is not even national, but international in its organization. There is too much conflict between the provinces and the Federal authority. It is a constant succession of expensive law suits to determine which possesses authority. In our adversity we are learning that we cannot afford to have all this multiplicity and conflict in government and administration and the time would appear to be ripe for the holding of a conference, not of a few days, but a comprehensive one to go over the B.N.A. Act in its entirety with a view to more clearly defining the respective jurisdiction of the Dominion and the provinces. In view of the different conditions prevailing in 1932 as compared with 1867, coupled with the rising costs of provincial government, it would seem to be the part of wisdom for the provinces to relinquish certain matters in regard to which they possess a divided control with the Dominion, and entrust them solely to the Federal authority in the interests of a more united and united Canada, and a lessening of the burden of taxation upon all.

Sharp Pains In His Heart Nerves In Bad Condition

Price 50c a box

Mr. Fred J. Chase, Thompson Station, N.S., writes: "I have used Milburn's Heart and Nerve Pills with wonderful results. My heart would beat so fast I would have to sit down when at work clinging to the wall. I had sharp pains in my heart when I would lie down at night. My nerves were also in a very bad condition, but after using two boxes of Milburn's Heart and Nerve Pills I feel just fine, and am fourteen pounds heavier than I have been for years."

Sold at all drug and general stores, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Cheaps Means Of Travel

Bicycle Is Very Popular In England and Europe

The bicycle is returning to favor. Cycle manufacturers are finding the demand for bicycles higher than it has been for the last seven or eight years. Certain places have always been known as Bicycle Towns. Bedford is the most famous example in England, and has the highest proportion of bicycles to its population. This is probably due to the flatness of the surrounding country. Abroad, the bicycle is very popular. Copenhagen, for instance, moves almost entirely on the bicycle, so does the Hague. In Berlin the streets are crowded with bicycles at the hours when people are going or coming from work. Factories on the outskirts of the city have accommodation for thousands of bicycles, as most of the workers find this the cheapest way of travelling.

FASHION HINT

"How to make my old short skirts conform to the new length with a problem to me until I hit on this plan. I dropped the hems; and as the plan that had been turned down was darker than the rest, I redyed the entire dress, after having bleached the skirt, following the directions in the Diamond Dye package. "I used Diamond Dyes for the redyeing. I was surprised to find many things with these wonderful colors. They have saved me many dollars and have enabled me to give perfect results—smooth, even colors fast to wear and washing. Friends think my skirt is new. I redyed or tint them with Diamond Dyes. They do give the most gorgeous colors."

Mrs. G.C. Lewis, Quebec.

Gold Mine In Sweden

Third Largest In World Is Situated Under a Lake

The third largest gold mine in the world, situated beneath a lake in the north of Sweden, in a district producing annually more than eight million dollars worth of the precious metal, is described in an official statement by Count Albert Ehrensvard, the Swedish Minister in Paris. Count Ehrensvard predicts that Sweden may advance to the front rank of gold-producing countries. Since 1918 engineers and geologists have been working secretly in the primitive Skelleftea district on the Baltic Sea, the Minister declared, and have progressed to a point where more than forty shafts are being developed. The mines produce silver, zinc, and arsenic in sufficient quantities to pay entirely for the working of the Balden under-water mine, discovered only in 1924, and now the third most important gold mine in the world.

Relieves Asthma At Once. If you could read the thousands of unsolicited letters received by the makers from grateful users you, too, would realize the remarkable powers of Dr. J. D. Kellogg's Asthma Remedy. All cases, including chronic, are benefited by this great family remedy. Why suffer or experiment with worthless preparations when the genuine Kellogg's can be purchased everywhere.

Priceless Tapestry Damaged

A priceless tapestry depicting the childhood of Christ in the Church of the Nativity in Bethlehem, was slashed with a knife in the absence of the usual police guard. The Church of the Nativity, built over the manger in which Christ is supposed to have been born, is visited by many thousands of pilgrims every Christmas. The tapestry was presented to the church by France in 1871.

There is nothing repulsive in Miller's Worm Powders, and they are as pleasant to take as sugar, so that free children will refuse none. In some cases they cause vomiting through their action on an unclean stomach, but this is only a manifestation of their cleansing power, no indication that they are harmful. They can be thoroughly depended upon to clear worms from the system.

The first stainless steel was the work of Michael Faraday, English physicist.

Nearly 50 firms are now engaged in the Scotch tweed industry of Scotland.

Quick action across trouble, worry, Keep Douglas' Egyptian Liment always handy. Stops bleeding instantly. Cures wounds. Quickly relieves Burns, Itch and Ringworm.

BABY'S OWN TABLETS

Make and Keep Children Well—As Mothers Know

Another Patent For Late Thomas Edison

Given For Apparatus Which Electroplates Nickel On Diamonds

Edison is dead, but the United States Government is still awarding him patents for his inventions. The Patent Office has just issued a patent to Thomas A. Edison for an apparatus which electroplates nickel on diamonds to be used in cutting and grinding tools. The diamond is the hardest known substance and it is therefore very efficient in grinding metals such as steel. It is difficult to mount these diamonds in suitable tools, Edison's invention overcomes this difficulty by providing a machine which electroplates nickel on the diamonds, after which they can be held rigidly in grinding tools. Edison also proposed to mount diamonds in a similar manner for phonograph needles. The signature of Edison in his well-known, arm and bold handwriting appears on the drawing of the patent.

In These Hard Times

Yes, these are hard times. We throw away ash and bay soap; we raise dogs and buy hogs; we grow weeds and buy vegetables; and brooms; we catch fish with a \$4 rod; we build schoolhouses and send our children to be educated away from home; and at last we send our boy with a \$40 gun and \$10 dog to hunt 10-cent rabbits.

Worms in children, if they be not attended to, cause convulsions, and often death. Mother Graves' Worm Expeller will protect the children from these distressing afflictions.

Making artificial flowers has become a "cottage" industry in Czechoslovakia.

Hunted Foxes Display Remarkable Ingenuity

Destroy Their Secret By Running Along Railway Lines

Hunted foxes and hares display considerable ingenuity and, at least, of their tricks cannot be the result of ancient hereditary; they will run along railway lines keeping on the metal rails. This appears to be a further application of the habit, common to hunted animals of running in a stream, to destroy their scent, the cold rail may have suggested cold water; actually it has much the same effect.

Simple Remedy For Bad Stomach Gives Swift Relief

No Need Of Strong Medicines, Or Diet. Safe and Simple Home Recipe Recovers Stomach In Five Conditions.

If you are a victim of stomach trouble—flat, sour, nervous, pain or bloating—you may have quick and certain relief by taking this simple remedy. Don't take strong medicines, artificial stimulants or laxatives, but system with starvation diet. For within reason, food does what what they like. From morning meals that hinder or enlarge the work of digestion. And the best and easiest way to do this is to follow every meal with three or four tablets of Hesperized Magnesia, a pleasant, harmless, inexpensive, and never failed form of Hesperized Magnesia, which neutralizes acidity and keeps your stomach sweet, moist, digesting. A week's trial of Hesperized Magnesia tablets, which cost only 30¢ per box, and supply of Hesperized Magnesia is absolutely unnecessary. Be sure to get Hesperized Magnesia tablets!

Brazil's population has increased 27 per cent. in ten years.

It is thought that a full moon weakens radio signals.

NEURALGIA

THE agonizing aches from neuralgia can be quieted in the same way you would end a headache. Take some Aspirin tablets. Take enough to bring complete relief. Aspirin can't hurt anybody.

Men and women bent with rheumatism will find the same wonderful comfort in these tablets. They won't hurt for headaches or colds! Read the proven directions covering a dozen other aches; neuritis, sciatica, lumbago; muscular pains.

Cold, damp days which penetrate to the very bones have lost their terror for those who carry Aspirin tablets with them! All drug stores, in the familiar little box. Made in Canada.

Federal Government Considers Question Of A Railway Outlet For The Peace River District

Construction of the Peace River district railway outlet was a matter for consideration by the Federal Government, R. J. Manion, Minister of Railways, told the House of Commons. Although much thought had been given to the question, the administration was not prepared to announce its decision at the present time.

"I believe firmly a Peace River outlet will have to be built," said the railway minister. "It is only a matter of time, a question as to when it will be built."

Neither the Canadian National nor the Canadian Pacific Railway considered the Peace River outlet an economic feasibility at the present time, said Dr. Manion. They would not undertake its construction. This threw the question back to the Federal Government.

Charles Stewart, former Minister of the Interior, considered the Peace River outlet so important he advised the government to delay for a short time the St. Lawrence River development and give precedence to the first-western railway.

The Peace River outlet has become a perennial question in the House. It is proposed to link up the "agricultural empire" of the Peace River with the Pacific Coast. Its only connection with the south at the present time is through Edmonton, Alberta. The estimated cost of the western link has been placed between \$12,000,000 and \$20,000,000, depending upon the number and extent of branch lines and the route.

During the past year a committee of engineers studied the problem at the request of Dr. Manion. Their report was unfavorable to the immediate construction of the line, but they favored the slow route. The minister of railways said both Sir Henry Thornton, president of the Canadian National, and Edward Beatty, president of the Canadian Pacific, concurred in this report, although Mr. Beatty did not support the slow route.

Mr. Kennedy said the question of the outlet had been studied without consideration being given to all the facts. The population of the Peace River country had grown from 20,000 to 40,000 people within the last five years, and there had been a drift of new settlers into this district from the arid-out areas. Construction of the outlet would provide assurance to begin in this district in the development of their farms and was a better step than the giving of relief.

The yield per acre in the Peace River district was from four to six bushels higher than the yield in the prairie provinces, and the land available in the Peace River section was of the best quality. Mr. Kennedy declared. He took issue with statements of engineers in regard to the saying possibilities in carrying products from Peace River to British Columbia.

Mr. Manion asserted that, if his memory served him correctly, the president of one of the railways, either Sir Henry Thornton or Mr. Beatty, had declared it would require 10 times the present crop in the Peace River district to justify building the outlet.

"The rates from Grand Prairie, in the Peace River, to Fort William and also to Vancouver were quoted by Dr. Manion. He did not regard them as unreasonable in view of the distance involved."

"Is there any greater misfortune than to be married to you?"
"Yes to have been with you!" The Musketeer, Vienna.

W. N. U. 1034

Lipton's Fortune

Efforts To Win Yacht Cup Resulted Him From Millionaire Class

Sir Thomas Lipton's efforts to win back the America's cup for Britain removed him from the millionaire class just before he died, so his friends say.

It was believed at the time of his death in October, that his will would show a fortune running into millions, but the total estate was worth only \$500,000.

"The America's cup races cost Sir Thomas very much more than was generally realized," said one of his most intimate associates. "Besides, he disposed of several large sums of money in the years before his death."

Lipton's affection for his friends in the United States remained to the end, for he bequeathed the gold loving cup, which was bought by popular subscription and presented to him on his last visit to New York, to the New York Yacht Club.

The greater part of the Lipton fortune went to hospitals and charities, though many substantial gifts were made to friends and old servants in both Britain and America.

By Annette

A DARLING WEE MODEL THAT IS EASY TO WEAR, TO MAKE AND LAUNDRY

Happy! Well I guess in such a comfy dress for playtime. The dropped hunched shoulders from the brief sleeves.

It's so simple, it could almost be run up on the sewing machine and finished before breakfast. Just a few seams to join and finish the neck and arms with the applied band trim.

Light navy blue pique with white dots and plain white trim is typically French.

Diapers, batiste prints and dotted awes are dainty as can be and study too.

Style No. 184 is designed in sizes 2, 4 and 6 years. Size 4 requires 1 1/2 yards 32 or 36-inch with 1/2 yard 39-inch contrast.

Price of Pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Indian Population

Increased figures shown for Saskatchewan and B.C.

The Indian population of both British Columbia and Saskatchewan increased during the last 10 years, figures issued by the Dominion Bureau of Statistics, indicate. Indians on British Columbia reserve in 1931 totaled 23,297, an increase of 2,953 in the decade, on Saskatchewan reserves, 11,829, a 10-year gain of 1,866.

British Columbia has a population of 694,263, an increase of 170,281 in the past decade, final figures for the census province census of 1931 show.

The population of federal electoral districts in: Carleton, 52,769, increase, 12,868; Comox-Alberni, 15,669, increase, 3,991; Fraser Valley, 68,567, increase, 1,680; Kootenay East, 22,066, increase, 5,429; Nanaimo, 35,524, increase, 7,511; New Westminster, 69,294, increase, 23,312; Skeena, 36,358, increase, 1,121; Vancouver-Burrard, 82,519, increase, 22,221; Vancouver Centre, 75,234, increase, 14,555; Vancouver North, 32,972, increase, 8,757; Vancouver South, 59,556, increase, 43,419; Victoria, 39,082, increase, 359; Yale, 10,637, increase, 4,839; Kootenay West, 39,913, increase, 9,441.

Official Smoke Inspectors

Men in London Keep Tab On Prohibited Kind

Probably the queerest job in London is that of two men whose job is to look out for smoke. The London Council has strict regulations against the emission of smoke from factory chimneys. On the roof of the Council ground power station at Let's Road, Chelsea, is a little hut inhabited by the smoke spotter on duty. He looks anxiously at the great chimneys, and then produces a glass screen. This is colored with four different shades. He looks through his screen and compares its color with that of the shades on the glass. Should the smoke be of the same hue as the darkest of these, the smoke-spotter presses a button. Instantly bells ring, hooters blow, and colored danger signals appear in various offices. One furnace is emitting smoke of a prohibited kind, and the boiler-room hums with activity until the smoke-spotter from his lofty perch gives what is quite literally the "all-clear."

Printers Are Responsible

Expression "Out Of Sorts" Is Used By Compositors

For the expression "Out Of Sorts" printers are responsible. The different kind and sizes of type used by a compositor are called "sorts." Sometimes his supply of some kinds may become exhausted, when any work in hand may have to be suspended until his "sort" is replenished from the typefoundry or the machines. While waiting for supplies, he is, of course, being unable to work properly, "out of sorts."

In the past two decades the use of alloy steels has grown ten-fold.

Gold Producing Provinces Of Western Canada Adding Materially To Nation's Wealth

According to preliminary estimates of gold production for 1931, the Yukon Territory and the gold producing provinces of Western Canada accounted for some 291,000 ounces, or nearly 14 per cent of the total production of the country. Manitoba's output advanced from 23,180 ounces in 1930, to 106,510 ounces in 1931. The output from British Columbia decreased from 164,331 ounces to 153,931 ounces, and that of the Yukon was slightly in excess of the previous year.

The increased output from Manitoba is largely accounted for by the continuous operation throughout the year of the Hudson Bay Mining and Smelting Company's smelter at Flin Flon, according to Mr. A. H. A. Robinson, of the Dominion Department of Mines, Ottawa. The smelter treats the copper-zinc-gold-silver ore from the company's Flin Flon ore body and from the Sherritt Gordon Company's mine at Sherridon. The Central Manitoba mine, operating a straight gold property in the south-eastern portion of the province, produced gold to the value of \$50,000 to \$100,000 monthly during the year. The Gem Lake Mine in the same section contributed a few thousand dollars to the output. A 50-ton mill is now in course of construction at this property, and will replace a small plant which was not equipped to recover that part of the gold contained in the sulphides. At the San Antonio property, near Central Manitoba, a cyanide mill having an initial daily capacity of 150 tons is expected to be in operation during the present month.

The decline in British Columbia's output is attributable to curtailment of production from copper mines, from which, normally, about 19 per cent of the gold output is obtained, to a smaller output from the Premier Mine, long the chief gold producer, and to the closing in 1930 of the Nickel Plate Mine. These decreases, however, were partly compensated for by largely increased production from the Pioneer, the Bell and the Union Mines and by a larger output of placer gold.

The Union property in the Grand Forks district was once a silver mine, but recent developments have changed it into a gold mine of considerable promise. The Reno Mine, on Sheep Creek, in the Nelson district, is a small property and operation may continue for some time. The Pioneer is also an old mine which has been re-opened, and which gives every promise of maintaining an important production for many years. A new mill with a daily capacity of 200 tons is being erected to replace the 100-ton mill now on the property, and a shaft is being sunk to a depth of 2,000 feet. The vein has been proved for a length of 1,500 feet on the eighth level, with an average width of 3 1/2 feet. The ore on this level averages \$20 to the ton. Dividends at the rate of 12 per cent.

per annum are being paid on the company's capitalization of \$2,000,000.

In a recent paper on "Lode Gold Mining in British Columbia," Mr. J. D. Galloway, the Provincial Mineralogist, estimates the reasonably indicated gold reserves in the known mines of the province, and in possible extension of known ore-bodies, to be \$20,000,000. This is exclusive of placer and probably has large a reserve as the province has had at any one time in its history; yet since 1865, lode gold to the value of \$146,868,011 has been produced. Reserves indicated at present, in conjunction with the probabilities and possibilities of semi-developed mines, prospects and unprospected areas, portend a bright outlook for gold mining in the province.

In the Yukon the placers in the immediate vicinity of Livingstone were being prospected vigorously during the summer of 1931. This area had been practically abandoned for a number of years. Considerable activity was also in evidence in the vicinity of Caribou, where a lode gold discovery was made during the summer of 1930. The scene of the discovery was later visited by a number of geologists, but no reliable information is available as to its nature or extent.

Peace Garden

Proposed To Plant Decorative Strip Three Thousand Miles Long

Recently a number of Canadian business men in England have been sounding as to the likelihood of their giving financial and other support to a picturesque scheme for establishing a strip of decorative landscape garden along the border along the Canada-United States border. This border is already famous for the absence of a single fortification.

The idea appears to be that a fund of five million dollars be raised by public subscription in the United States and Canada, the bulk of which might come from those who might benefit by the tourist trade likely to be increased greatly by such an attractive lure, and the garden—3,000 miles long might be maintained by the interest on such a fund.

At various points along the border botanical museums and hothouses might be established where delicate trees and plants could be reared. Such a project, too, would provide work and incidentally settle the problem for many parents of what to do with their sons because of the limited number of good gardeners in North America.

Such a garden would bring much publicity to both Canada and United States and because of its unique position, forming the boundary between two countries and because of its great magnitude, stretching 3,000 miles and dividing a continent, it should merit a place as perhaps the eighth wonder of the world. Regina Leader.

Canadian Banks

There are 18 chartered banks in Canada, with over 4,000 branches of which 179 are in other countries, mainly in Newfoundland, the West Indies, Central and South America and also in the great centres of international finance, London, Paris and New York. The assets of Canadian banks are placed at \$2,045,000,000.

Latvia has been cutting down its unfavorable trade balance every month for almost a year.

"I am sorry to tell you that your husband will never work again."
"I will go and tell him. He will be so pleased!" Pele Mole, Paris.

"Old Granite" Softens Up

Throwing off the cares of state and the worries attendant upon the presidential election, President Paul von Hindenburg, Germany, is shown as he took a stroll in the Wilhelmstrasse at Berlin with three of his grandchildren. President von Hindenburg is still regarded as the most popular man in Germany.

Trelle's Champion Grain To Be Given Junior Growers

Championship oats from Herman Trelle, world's wheat and oat king's farm at Wenlock will be made available this year to the Boys & Girls Seed Oats Clubs of the province according to an announcement made Tuesday by department of agriculture officials.

Through the beneficence of the United Grain Growers it has been made possible to obtain a carload of 1750 bushels of first-generation Victory oats from Mr. Trelle, who has won many prizes with this strain.

Clubs using Banner oats will receive oats grown by Nels Linden, of Wetaskiwin, who is the most noted grower of this strain in the province and who has won many prizes.

Provincial Levy Totals On Married Men

Table also Gives New Federal Income Tax Imposts.

According to figures published at Edmonton, married men in Alberta will contribute as follows to public funds under the new provincial and revised federal income tax levies which are shown in the table here-with.

The figures given consider only exemptions of \$2,400 in the federal act and \$1,500 in the provincial. Allowed to married persons without dependents, but also includes the \$3.00 provincial base tax:

Income	Prov. Tax	Fed. Tax	Total
\$1,500
1,800	6 00	6 00
2,000	8 00	8 00
2,500	13 00	2 00	15 00
3,000	18 00	12 00	30 00
3,500	23 00	22 00	45 00
4,000	28 00	32 00	60 00
5,000	33 00	60 00	93 00
6,000	38 00	98 00	136 00
7,000	43 00	147 00	190 00
8,000	48 00	205 00	253 00
9,000	53 00	275 00	328 00
10,000	58 00	353 00	411 00
15,000	73 00	911 00	984 00
20,000	1,018 00	1,730 00	2,748 00
25,000	2,453 00	2,788 00	5,241 00

The Dominion tax also allows deductions of donations to charitable organizations up to 10 per cent. of taxable income, but these deductions are not made in arriving at these figures, as the provincial tax does not make allowance for deductions, and the amount depends upon the individual case.

How Marx Brothers Received Pet Names

Where did the Marx Brothers get those comical names with the "o" ending? Did they make them up themselves; pick them out by numerology; get them from their childhood playmates—or what?

The answer was revealed by the boys themselves in Hollywood recently while working on their latest laugh producer "Monkey Business," which comes to the Opera House Monday evening next.

The names were the idea of Art. Fisher, famous vaudeville and at one time a leading monologist of the stage. The Marxmen have been thankful to Fisher ever since, for he has done them a valuable service in showmanship.

It happened this way:

The boys were playing an engagement as the Four Nightingales when they appeared with Fisher at a vaudeville house in Peoria, Illinois. Fisher saw striking characteristics in each of the four comics and he nicknamed them all as follows:—Groucho, because he was always serious on stage and off; Harpo, because of his harp-playing; Chico, because Fisher said he was the chicken-eating champion of the world; Gummo, because he always wore rubbers (often called "gum boots" in the early days).

The brothers adopted the names as trademarks and there are now persons today who know what their original names were. When Gummo left the stage to go into business, and the youngest brother of the family joined the act, he was called Zeppo, because of a lichen dance he used to do on the stage.

Which Stores Do You Like Best?

Isn't it true that stores which invite your custom oftenest, and which give you most information about their offerings, are those to which you go by preference?

Isn't it true that silent or dumb stores—stores which never tell you that your custom is wanted and valued, and which never send you information about their stocks and prices, are less favored by you than are stores which inform you by advertisements in this newspaper, about themselves, their stocks, their prices?

Isn't it true that you want, before you go shopping, information about goods of desire, which are obtainable locally, and about where they can be obtained?

The fact is that advertisements are a form or kind of news, and careful buyers want the kind of news which sellers provide, just as much as they want the news which it is the business of this newspaper to provide.

It is advantageous to you, regarded as a purchaser, to be "advertisement conscious," meaning to be observant of advertisements, and to be readers of them when seen in magazines, farm papers, and in your local newspaper.

The reading of the advertisements appearing in this newspaper week by week not only will save you time, by telling you what and where to buy, but also they will direct you to "call alive" stores, providing goods that have been carefully selected and competitively priced.

ALWAYS REMEMBER THAT THE STORES WHICH SERVE YOU BEST ARE THOSE WHICH TELL YOU MOST.

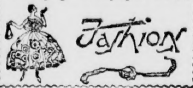

Try COFFEE . . . this Way!

ONCE you get better coffee in your coffee, you will never again be without it in the house. It is simply, smoothly, fully the coffee has a rich golden bloom, and one comes back for more.

Estevan Nurseries Make Gift Of Trees

100,000 Caragana Donated For Planting For Demonstration Purposes

Before the Orders of the Day were proceeded with last Tuesday, March 8, the Hon. J. F. Bryant, K.C., Chairman of the Drought Commission, read to the Saskatchewan House a letter just received from the Prairie Nurseries Limited, in which they offered to the Government a free gift of 100,000 heavy three-year-old caragana shrubs to be used in connection with the demonstration plot of the Government. The letter is as follows:

March 4th, 1927.
Dear Mr. Bryant:—Your address in Estevan last week, and the gross reports of the work of the Saskatchewan Commission on Forestry, have impressed us with the fact reaching possibilities for public good of the tree planting program you have inaugurated. As commercial nurserymen, we are particularly enthusiastic to see that part of your program that contemplates the establishment of another Government-owned free tree planting agency. We heartily approve, however, of the educational and experimental features of your program. We fully realize the urgent need for general co-operation in combating drought and soil drifting and wish to aid in the establishment of the drought demonstration area contemplated by your Commission.

To this end, our Directors have decided to offer the Province of Saskatchewan one hundred thousand heavy three-year-old Caragana trees free of charge. We make the offer because we understand that your Budget does not permit the purchase of the required stock and we are certain that delay until Government stock is large enough to plant will greatly lessen the effectiveness of your reforestation program. It is true to start your demonstration program is before the public has forgotten the bitter lessons of last Summer's drought. This offer is made with the understanding that the Caragana is to be used only in the main demonstration area near Regina and that the plantings be made the coming Spring. The demonstration plantings will provide valuable information for the farmers of Alberta and Manitoba, as well as those residing in Saskatchewan. Wishing you every success in your efforts to secure the co-operation of the public in combating drought, we are,

Yours very truly,
Prairie Nurseries Limited,
T. A. Torgeson,
Managing Director.

Commenting on the above letter, Mr. Bryant stated that the desired on behalf of the Government and on behalf of the Drought Commission to public knowledge of the splendid gift of the Prairie Nurseries Limited. The gift was extremely timely and was very generous. He hoped that it would be thrice blessed. It would bless the farmers in the experimental area who would have the benefit of the experiment, but would bless the other farmers of the Province who would share eventually in the benefit of the experiment and that it would bless the Nurseries Limited themselves, in the years that

Mr. Bryant stated that the Government had already acquired 50,000 Caragana for the institutional farms surrounding the Galt. The 100,000 caragana received from the Prairie Nurseries and the 50,000 which were available from the Forestry Station this year for the demonstration plot, would give 200,000 trees, and enable them to plant nearly forty acres of caragana hedge. This would be arranged in an area of one-half township, starting at Winnipeg Street and No. 1 Highway, following an area one mile south of the main highway and two miles north of the main highway to a point six miles east of Winnipeg Street. This is in the heart of the heavy drifting area, and was chosen as a demonstration plot in the following reasons:

It surrounds the Galt farm and the supply of seedlings in future would be readily available.

It is along No. 1 Highway, and is adjacent to the main line of the Canadian Pacific Railway and therefore is available for demonstration purposes.

It is in a convenient location as to be under the direct supervision of the Superintendent of Institutional Farms, of Mr. Rose, of the Forestry Station, and of the representative of the Federal Experimental Farm.

It represents a class of land varying from heavy clay soil to light sandy soil.

Head Colds Relieved with Vapoars

Snuff Vicks up nose or neck in hot water and inhale vapors

VICKS VAPORUB
OVER 12 MILLION JARS USED YEARLY

will return the grass and pound for it and that they receive. The amount of grass should enable the ship to the road to be planted to grass and should give ten acres of grass to each farmer of a moderate section. The grass sowing to be extended from year to year.

The cultural methods of various lands recommended by the Committee will be observed and copied by the Institutional Farms staff. This will include the various methods of spring cultivation, strip farming methods, the different summer fallow practices, and the fall cultivation.

This is the first concrete area in the Province where an attempt has been made on a large scale to prevent soil drifting on this basis. The programme will develop and will be carried out and we trust that the farmers from all parts of the Province who visit the Royal Canadian Agricultural Exhibition will take the opportunity of visiting the demonstration area.

The work is being done by the Provincial Government with the hearty co-operation and assistance of the Federal Government, Department of Agriculture, and Mr. Norman Ross, Chief of the Forestry Branch, and the head of the Royal Experimental Farms will work in connection with the Superintendent of Saskatchewan Agricultural Farms in connection with the matter.

The fact that we are able to start the first EXHIBITION SHED for the full experiment this year, stated Mr. Bryant, is due to the generous and magnificent gift of the Prairie Nurseries Limited.

Recipes For This Week

(By Betty Harvey)

BREAKFAST MUFFINS

- 2 cups special cake flour, sifted.
- 2 teaspoons baking powder.
- 1 teaspoon salt.
- 1 egg, well beaten.
- 1/2 cup milk.
- 4 tablespoons butter or other shortening melted.

Slit flour once, measure and baking powder and salt, and sift again. Combine egg and milk and add to flour, beating until smooth. Add shortening. Bake in greased muffin pans in hot oven 140 degrees Fahrenheit 25 minutes. Makes 16 muffins.

USE ORANGE AND LEMON PEEL

You throw away many a delicious morsel when you cast your orange and lemon rinds aside. Grated rinds, or cakes, pies, tarts, puddings, loaves, fillings, sauces and other foods.

In grating, only the yellow portion of the rind should be removed. This portion contains the oils that give the flavor. Grated peel may be used fresh or mixed with sugar and kept in a tightly-covered jar. Where the whole peel is used it is ground fine, mixed with sugar, and used in the same manner as the grated rind.

The Canong Industry

In 1924 a total of 151 canning establishments in Canada canned or packed 5,560,288 cases of vegetables, of which 2,015,635 were tomatoes, 1,356,979 were corn, 1,118,798 peas and the remaining 105,876 were mushrooms, spinach, etc. The pack of tomatoes was 731,531 cases, the leaders being peas, corn, and mushrooms.

Once Is Enough

A new insect discovered in Central Africa is to be called Nitidulid-plagiostomatina. We hope not to have to refer to this again.

Sluggish Liver And Rheumatism

Bath Corrected By Famous Vegetable Pills

"I received immediate relief from Carter's Little Liver Pills," declares Mr. Arthur P. The commandment to suffer from Rheumatism and Indigestion, because they are PURELY VEGETABLE, gentle effect upon the bowels, liver and blood. Dr. Carter's Little Liver Pills are without equal for correcting Indigestion, Acidity, Flatulence, Headache and Liver Complaints. 25¢ A 75¢ package. Sold every where.

White Sailor Ruled Big African Tribe

Wandered Into Interior After Shipwreck On Gold Coast

The story of a real-life romance and adventure, rivaling the most ambitious fiction of Sir Rider Haggard, has been carried by a small boat off the coast of the Gold Coast in a humble home in Dulbar of an aged German railway pensioner and his wife.

The letter came from the British Commissioner of a Gold Coast district. It told the astonished old couple that their son, Wilhelm Knog, whom they had not heard of since twenty-nine years ago, when he was reported lost in a shipwreck off the Gold Coast, had just died in Africa. Old Mrs. Knog read the letter with difficulty, for his eyes were bad, and the German of the district commissioner was little better. He was, however, able to make out that when he was shipwrecked Wilhelm was cast up on shore and wandered aimlessly inland.

He worked his way through the jungle into the centre of darkest Africa. There he fell in with a negro tribe called the Mutsari.

A few years ago a British expedition found him there, raising over the negroes, and known as "The White Prince."

He had forgotten almost all his German and the little bit of sailors' English he had picked up, but in the African language of his tribe he told the Englishmen through an interpreter, how, many years ago, he had married the daughter of the Mutsari chief, and on the chief's death had succeeded him.

The Englishmen invited the German sailor to return with them to civilization. Knog refused, saying he was happier where he was.

The final chapter of the romance tells how negro rulers, obeying the demand of their "White Prince," brought the news of Wilhelm Knog's death to the nearest British official, so that it might be forwarded to his relatives in far-off Germany.

An Informative Book

Atlas of the Agriculture, Climate and Population of the Prairie Provinces

A new volume of considerable interest to business men and agriculturists has just been published by the Dominion Bureau of Statistics under the title, "Atlas of the Agriculture, Climate and Population of the Prairie Provinces of Canada." It is a statistical atlas and the first of its kind attempted for any section of the Dominion. The volume contains approximately 100 pages of maps, graphs and explanatory text.

The first section deals with physical conditions and includes a series of climatic maps especially prepared by the Meteorological Service of Canada. The second section traces the changes in farming since the beginning of the century and describes in detail the extent and condition of agricultural land and the distribution of field crops.

Another section is devoted to live stock and animal products. This is followed by an analysis of farm incomes, farm expenditures and farm values. The concluding sections deal with the size and tenure of farms and the distribution, nativity, racial origin, school and status and housing facilities of the population.

The Atlas is designed to serve the purposes of the business man, the agricultural scientist, the student of Canadian economic geography, and all persons interested in the expansion of settlement and activities in the West. It was prepared in the Bureau under the direction of Professor W. Burton Hutt, Dean of Brandon College, and Dr. T. W. Grindley, Chief of the Agricultural Statistics Branch of the Bureau, and with the cooperation of the Canadian Pioneer Provinces Committee, and various government departments.

Seek Origin Of Earthquakes

A new depth, 25,000 feet has been discovered in the Caribbean Sea, and scientists are hopeful that clues may be furnished there to the origin of earthquakes. Four thousand fathoms deep, however, is enough to daunt anyone but a movie diver, so the scientists have had resort to instruments. Montreal Gazette.

Experiments are being made in Ireland of the possibility of making salt shavings from seaweed.

COMFORT for COLICKY BABIES

... THROUGH CASTORIA'S GENTLE REGULATION

One of the most important things you can do to make a teething baby comfortable is to see that little bowels do their work of carrying off waste matter promptly and regularly. For this nothing is better than Castoria, a pure vegetable preparation specially made for babies and children. Castoria acts so gently you can give it to young infants to relieve colic. Yet it is always effective for older children, too. Remember, Castoria contains no harsh drugs, no narcotics, no harmful stimulants. When your baby is fretful with teething or a food upset, give a cleansing dose of Castoria. Be sure you get genuine Castoria with the name:

CASTORIA
CHILDREN CRY FOR IT

WORLD HAPPENINGS BRIEFLY TOLD

Maurice Dupre, solicitor-general of Canada, has been elected vice-president of the naval commission of the disarmament conference.

Canada's export of poultry has more than doubled in the last twelve months, ending January, according to the Dominion Bureau of Statistics.

A Dominion Bureau of Statistics report shows that the Indian population of Saskatchewan increased during the last ten years to 11,939, a gain of 1,665.

Five losses in Canada for February were estimated by the Monetary Times at \$2,981,550 as compared with \$2,417,750 for January and with \$1,498,325 for February of last year.

Neville Chamberlain, Chancellor of the Exchequer, hopes to attend the Imperial Economic Conference at Ottawa as a member of the British delegation.

It has been estimated that approximately \$400,000 will be required to finance the dispatch of Canada's team to the tenth Olympiad at Los Angeles this summer.

Commercial failures in Canada during January numbered 238, according to the Dominion Bureau of Statistics. Liabilities were placed at \$4,060,000. In the corresponding month last year, failures were 240 and liabilities \$2,970,000.

Part one of the report of Sir Alexander Gibb, eminent London, England, port engineer on his survey of Canadian ports is in the hands of the government, and the final part of it is on its way from London to Ottawa.

Sir Philip Sassoon, under-secretary for air, announced in the British House of Commons that the Schneider trophy air races were completely over. "The contest has outlived its usefulness," he said.

Wanted a Road

A delegation of citizens, headed by a local councillor, called upon the local council to protest against the condition of a certain road. After all had been heard, the Chairman of the Board, in a polite manner, said: "From all reports, I'd say the road was fairly good, taken as a whole."

"True," said the spokesman for the complainants, "but we want to use it as a road, not as a whole."

Dr. Fink's Vegetable Compound

"Hodder & Stoughton, Ltd., London."

CHAPTER XV. Continued.

And now, without warning or pre-
monition, she found herself face
to face with the fact that Blaise had
been married. That he had belonged
to another woman! It seemed to her
that she suddenly very far apart from him,
and a fierce, intolerable jealousy of
that other woman leaped to life in
her heart, racking her with an an-
guish that was almost physical. She
was confused, bewildered, by the
storm of emotion which suddenly
swept her whole being.

"Married? He?" she repeated with
dry lips.

"Yes. Did you know that Blaise
was a widower?"

"Had Lady Anne divided the stress
under which the girl was labouring
that she so quickly interposed the
knowledge that his wife was dead?"

"No," answered Jean steadily. "I
didn't even know that he had been
married."

"The fact of that other woman's be-
ing dead did not serve to allay the
turbulence within her. She had lived, and
while she lived she had been in this
world."

"Yes, he married her," Lady Anne
went on, speaking in level tones. "It
thinks matters were hurried to a clin-
ch by the fact that Nesta's step sis-
ter, Margherita Vadi, detested Eng-
lish people. She was much the elder
of the two, and as her mother had
died when Nesta was born, she had
practically brought the girl up. She
would never have countenanced the
idea of her marrying an Englishman,
and Nesta so contrived her meetings
with Blaise that Margherita was un-
aware of his very existence, and
eventually they married without her

knowledge. From that day onward,
Margherita declined to hold any com-
munion with her sister."

"Why had she such a rooted anti-
pathy to the English?" Jean had re-
covered her composure during the
course of Lady Anne's narrative, and
now put her question with a very
good semblance of detachment. But,
inside, her brain was dully hammer-
ing out the words "Married—mar-
ried!"

"It seems that Margherita's step
father—Nesta's father, of course—
was an Englishman, treated his wife
extremely badly, and Marghe-
rita, who had adored her mother, never
forgave him and hated all English-
men in consequence. At least, that
was what Nesta told Blaise, and it
seems quite probable. Italians are a
bit blooded race, you know, and very
vindictive and revengeful. Of course,

these Vadi were of no particular
family, that was where the trouble
began. Nesta was just a rather sec-
ondary, though extraordinarily
beautiful girl, suddenly elevated to a
position which she was not in the
least apt to fill. It didn't take a
month for the glamour to wear off,
and for Blaise to see that as I saw
her. He came to his senses to find
himself married to a bit of soulless,
passionate flesh and blood. Oh, Jean!
If I could only have been there—in
Italy, to have saved him from it all!"

Jean hardly needed that instinctive
motherly—she was keyed up to
know the end of the story. She felt as
though she must scream if Lady
Anne were long about the telling.

"Go on," she said, forcing herself
to speak quietly. "Tell me the whole
of it." The rest had the Tormarin tem-
per for its correlative. Nesta was
an utterly spiteful child, and a coquette
to her finger-tips. She tossed dignity
to the winds, and there were everlast-
ing scenes and quarrels. The next
day, Blaise came in and found her en-
tertaining a man whom he had for-
bidden the house. I don't know what
he said to her—but I can guess, poor
child! He horsewhipped the man, and
he must have frightened Nesta into
leaving him. That evening she ran
away from Blaise—Nick and I, of
course, were living at the Dover
House then—and after months of
fruitless enquiry I had a letter from
Margherita Vadi telling me that Blaise
had been found drowned. She had evi-
dently made her way back to Italy,
hoping to reach her sister, and then,
in a fit of despair, committed suicide."

"Oh, poor Blaise! How awful for
him!" exclaimed Jean, brown-stick-
ed. For the moment her own individ-
ual point of view was swept away in
a flood of sympathy for Tormarin.

"Yes, it broke him up badly. Al-
ways, I think he is brooding over
the past. It colours his entire outlook
on things. And so he blamed himself
for his ungovernable temper—for
the whole tragedy. . . . If only he had
been gentler with her, not terrified
her into running away! . . . After
all, she was a mere child—barely
twenty—she was a heartless, con-
scienceless naïf, nevertheless. . . .
And Margherita Vadi did not let him
down lightly. She wrote him a terrible
letter, accusing him of her sister's
death. I opened it—he was abroad
at the time, but, of course, he had
to see it ultimately. Tied up in a little
separate packet was Nesta's wedding-
report, together with a newspaper re-
port of the affair, and, to add a last
stab of horror, she had folded the
newspaper clipping and thrust it
through the wedding-ring, labelling
the packet 'Cause and effect.' It was
a brutal thing to do."

They were both silent for a space,
Jean painfully envisaging the tragedy
that lay behind that stern looking
gravity of Tormarin's. Lady Anne
asking herself tentatively if she had
been wise—if she had been wise in
her disclosure? She wanted her son's
happiness so immensely! She be-
lieved she knew where it might lie,
and she had risked over the burning
embers of the past that she might
help to give it him.

She knew that he himself was very
unlikely to confide in Jean the story
of his unhappy marriage, or that if he
ever did so, it would be but to shoul-
der all the blame himself, exonerating
Nesta entirely. Nor, unless Jean
understood the fiery furnace through
which he had passed, that ordeal of
unpleasant, mistaken love, of disillu-
sion, and, finally, of the most bitter
retro-spect, could she possibly in-
terpret aright Blaise's strange, enur-
gated, his insistent efforts to
stand always on one side, as though
he were entitled to make no further
claim on life, and, above all, the bit-

How Modern Women Lose Pounds of Fat

At the Same Time Gain in Physical Vigor, Liveliness and Health, and Possess a Clear Skin and Eyes that Sparkle with Glorious Health.

Here's the recipe that banishes fat and brings into blossom all the natural attractiveness that every woman possesses.

Every morning take one half tea-
spoonful of Kruschen Salts in a glass
of hot water before breakfast.

Be sure and do this every morning
for "It's the daily dose that takes off
the fat." Don't miss a morning.
Kruschen fully means that every par-
ticle of poisonous waste matter and
harmful acids and gases are expelled
from the system.

While taking Kruschen out
poetry and fatty meats, and go light
on potatoes, butter, cream and sugar.
At the same time the stomach, liver,
kidneys and bowels are tuned up and
the pure, fresh blood containing
Nature's six health-promoting salts are
carried to every organ, glaze the nerve
and fibre of the body. This is followed
by "that Kruschen feeling" of en-
ergetic health and vigor that is re-
flected in bright eyes, clear skin,
cheerful vivacity and charming figure.

FREE TRIAL OFFER

Write for a free trial of 75c. bottle today
which we will guarantee to refund to you
if you do not find it beneficial. We
will also send you a booklet, "How to
lose fat and gain health," which is
valuable to every woman. This offer
is good for 10 days. Write to: Kruschen
Salts, Ltd., 10, Abchurch Lane, London,
E.C. 4, England. Manufactured by
Dr. G. Kruschen, Ltd., London, E.C. 4, England.

ter quality which permeated his
whole outlook.

All these things had been in Lady
Anne's mind when she had decided to
enlighten Jean. She had seen, just
as Judith had seen, whether Blaise
was tending, fight against it as he
might, and she was determined to re-
move from his path whatever stum-
bling-block and hindrance she could.
And in this instance she felt instinc-
tively that Jean's own attitude might
constitute the greatest danger. Any
woman, as sincere and sensitive as
she, might easily be driven in upon
himself, shrinkingly misunderstanding
Blaise's deliberate aloofness, and thus
inconsciously assist in strengthening
that barrier against love which he
was striving to hold in place between
them—and which Lady Anne so
yearned to see thrown open.

It was to this end that she had re-
opened the shadowed pages of the
past—so that that foolish obstacle, born
of sheer misunderstanding, might im-
peril her son's hope of happiness if
the time should ever come—as she
prayed it would come—when he would
free himself from the shackles of a
tragic memory and turn his face to-
wards the light of a new dawn.

CHAPTER XVI.

The Gift Of Love

There are some people to whom
love comes in a single instant. It
is as though the heavens were
opened and the vision and the glory
therein in a sudden, transcendent re-
velation. To others it comes gradu-
ally, their hearts opening diffidently
to its warmth and light as a cloud
unfolds its petals, almost impercepti-
bly, to the sun.

With Jean, it coming partook in a
measure of both of these. Love itself
did not come to her suddenly. It had
been secretly growing and deepening
within her for months. But the
recognition of it came upon her with
an overwhelming suddenness.

Lady Anne, in recalling that bleak
tragedy of the past, had accomplished

more than she knew. She had shown
Jean her own heart.

From those fierce, unexpected
pangs of jealousy which had stabbed
her as she realized the part played by
another woman in Blaise's life—the
woman who had been his wife—had
sprung the knowledge that she loved
him. Only love could explain the in-
stant, clamorous rebellion of her
whole being against that other wom-
an's claim. And now, looking back
upon the months which she had
spent at Staple, she comprehended
that the veiled figure of Love, face
shrouded, had walked beside her all
the way. That was why these even-
ing, uneventful weeks at Staple had seem-
ed so wonderful!

(To Be Continued.)

Cunard Steamship Sailings

St. Lawrence Season To Open Much Earlier This Season

What will be the earliest departure
date from British ports to Montreal
for many years, has just been an-
nounced by the Cunard Line, who
have scheduled their liner "Ascania"
to open their St. Lawrence season
two or three weeks earlier this year
on account of the unusual weather
conditions. We expect this will prove
a very popular move," said Arthur
Randles, general passenger manager
of the Cunard Anchor-Donaldson
Lines in Canada, in an interview with
the Press.

A special spring sailing will be
made by the Anchor-Donaldson liner
"Lettitia." On her first trip here this
season, she will be used as a Scottish
Trade Mission Exhibition ship, bring-
ing over a hundred Scottish manu-
facturers with exhibits of their products.
During the week the ship is in port
here she will be used as an exhibition
ship and thrown open to the general
public and buyers. The Hon. H. H.
Stevens, Minister of Trade and Com-
merce, will go to speak at the
opening dinner on May 16th, on board
the ship, when he will welcome the
Scottish visitors and their friends.

Another event of importance for
the forthcoming Cunard season is af-
forded by the advent of several of the
largest Cunarders in the St. Law-
rence on short cruises from New
York. These will include no less a
liner than the "Mauretania," which is
scheduled to make three trips to the
St. Lawrence, visiting the Saguenay.
She will also call at Quebec. It is ex-
pected that the use of this famous
liner on this route will bring thou-
sands of American tourists to St.
Lawrence and visit the Canadian
attractions as a tourist country.

The Cunard and Anchor-Donaldson
Lines have set aside several of their
summer sailings at the height of the
season for their new "Restricted
Third Class." On these sailings the
usual third class accommodation will
be reserved entirely for "White Col-
lar," passengers, i.e.—students, busi-
ness men, teachers, etc. On these
sailings the third class accommodation
will be considerably im-
proved and will approximate in char-
acter the original tourist third class,
although the ordinary third class
rates will apply.

Excellent For Croupy Children.—
When a child is suffering from croup
it is a good plan to use Dr. Thomas'
Electric Oil. It reduces the inflamma-
tion and loosens the phlegm, giv-
ing speedy relief to the sufferer. It
is equally reliable for sore throat
and chest ache, rheumatic pains,
cuts, bruises and sprains. Dr. Thomas'
Electric Oil is regarded by many
thousands as an indispensable of the
family medicine chest.

In Reverse Gear

Two showmen were talking togeth-
er, not having met for some years.
"How is that Italian abroad get-
ting on, Signor Marco, that used to be
with the circus?" asked the first.
"Oh, well," said the other, "his
great ambition was to walk a tight-
rope on his head, get rich, and re-
tire."

"Ah!" said the first. "He did it,
and now he's resting on his laurels!"
"No," was the reply. "He tried it
and now laurels are resting on
him."

Persian Balm cures lovely com-
plexions. Softens, soothes and
relieves the skin. Makes it deli-
cately soft-textured. Aluminous fra-
grant. Delightful to use. Swiftly
absorbed by the tissues, imparting
that elusive charm so distinctive
of the dainty woman. Persian Balm
protects the delicate skin. Preserves and
enhances the loveliest complexion.
Every discriminating woman should
use this silvery lotion. It is unrivalled
as a flawless aid to beauty.

Utterly Worn-Out

Mrs. Fitzpatrick Tells How Dr. Williams' Pink Pills Made Her Well.

Can Now Run Upstairs.

"I became run-down and unable to do my work for a family of seven," writes Mrs. W. P. Fitzpatrick, Marquis, Sask., "I was told I had anemia, and I took treatment, but with very little improvement. Finally my sister, who had had the same disease, advised me to try Dr. Williams' Pink Pills, as they had done her much good. I have taken seven boxes. Today I'm well; able to do my own work; no more tired feeling or weak spots. I can run upstairs without pausing. I sleep and eat well. My friends are astonished at my changed appearance and never fail to ask what I'm taking. My reply is Dr. Williams' Pink Pills."

Dr. Williams' Pink Pills actually create an abundance of new red blood, which is the reason why they have given new vitality and strength to thousands of such nervously exhausted and overworked women. Equally helpful for growing girls. Try them. At your druggist in the few glass containers. 50c a package. 75c a dozen.

Little Helps For This Week

"If ye seek Him, He will be found of you." 2 Chronicles ix, 2.

Onward we sweep through smooth
and stormy seas.

We are voyagers all in shine or
gloom.

Alone dreamer who skulls by his
chimney warmer.

Drifts in his sleep to doom,—to doom,
—John Sterling.

The great thing in this world is not
so much where we stand as in what
direction we are moving. To reach the
port of heaven, we must sail some-
times with the wind and sometimes
against it, but we must sail, and not
drift nor lie at anchor.

—Oliver Wendell Holmes.

No wind serves him who addresses
his voyage to no certain port.

Montaigne.

The old proverb might be revised
to read that those who live by the
sword shall perish by the taxes.

DECLARE THEY HATE SIGHT OF DUST CLOTHS

Canadian women value dust cloths
a nuisance to use and to wash

MUCH PREFERRED
WONDER PAPER

With so much furniture thought being
given to eliminating unnecessary house-
work, it is only natural that a worthwhile
method for the dusty dust cloth should
be sought.

Now it has been found! Appléwood
Wonder Paper which is a new and
clean—anti-pollutants—is receiving a hearty
welcome from Canadian women who
least dust cloths and all they stand for.
Wonder Paper is made from clean glass
and soft paper pulp, thoroughly impreg-
nated with a high grade, fast, durable
and does not absorb of spreading it.
Appléwood Wonder Paper comes in hand-
sized packages, twenty-five sheets, each
as large as a dust cloth. You merely sweep
a sheet into a soft wall, and go over the
surfaces requiring attention.

You'll be amazed at the quick and lasting
finish Wonder Paper gives. When one
sheet is worn and soiled, simply turn the
Wonder Paper inside out. After the
furniture or woodwork has been gone
over, you can still use your Wonder
Paper on the floors.

And when you're through—throw it away.
No dust to shake out or wash. No
labor at all. The most convenient method
of housework done in half the time and
with half the effort. Doesn't the idea
appeal to you?

Special Offer
Wonder Paper, made by the makers of
the famous PARASOL brand waxed
paper in the Green Box. Most generous
and complete department store offer.
Appléwood Wonder Paper. If yours
don't, don't forget to check up and have
such a new and unique beauty and
"leftovers" containing one hundred
receipts, as a bonus for your trouble.

Appléwood Paper Products, Ltd.,
Hamilton, Ontario.

Enclosed find 25c for which
please send me one box of
WONDER
PAPER and your 100 receipts for
"Left-overs."

SOUR STOMACH

JUST a tasteless dose of Phillips' Milk of Magnesia in water. That is all, and it is so harmless. It has been the standard for 50 years. One spoonful will neutralize at once many times its volume in acid. It's the right way, the quick, pleasant and efficient way to kill all the excess acid. The stomach becomes sweet, the pain departs. You are happy again in five minutes.

Don't depend on other methods. Employ the best way yet evolved in all the years of science. That is Phillips' Milk of Magnesia. Be sure you get the genuine.

The ideal digestive for clean teeth and healthy gums is Phillips' Dental Magnesia, a superior tooth-paste that safeguards against tooth decay. (Made in Canada.)

Items of Interest.

Every province in Canada is now
 active in preparing for the sowing
 of good seed this spring having in
 view the growing of samples for
 entry in some of the 30 classes of
 the World's Grain Show at Regina,
 Canada.

Premier J. E. Brownlee, who re-
 turned home Sunday from a busi-
 ness trip to Ottawa, Toronto and
 Montreal, declares that eastern
 financial interests are looking to a
 good crop on the prairies to give
 the required incentive for an upturn
 of business.

Damage to roads, phone and
 telegraph lines is estimated to run
 into well over \$1,000,000, but var-
 ious authorities are unable to set
 the losses until more detailed re-
 ports are to hand. The telegraph
 department of the Canadian Pa-
 cific Railway alone estimates their
 loss to run to at least \$35,000.

Urging that the federal govern-
 ment take immediate action to pre-
 vent Canada's prospective supply of
 radium falling into the hands of a
 foreign monopoly and advocating
 government control of development
 and sale of radium, a resolution
 adopted by the council of the Col-
 lege of Physicians and Surgeons of
 Alberta will be forwarded to Ot-
 tawa.

Leading United States farm im-
 plement manufacturing companies
 plan to extend to Canadian farmers
 the same guarantee of wheat prices
 in connection with instalment sales
 of their products as already apply to
 full payments of merchandise pur-
 chased this year by farmers of that
 country.

The probable guaranteed price
 for Canadian wheat will be 80 cents
 a bushel, against 70 cents for
 American wheat.

Canadians will have the opportu-
 nity of seeing some of the world's
 finest cricketers when the Australian
 eleven tours the Dominion this
 summer. Led by the famous De
 Bradman, holder of the record for
 the highest single innings score in
 test match cricket, the Aussie
 eleven will include players who
 have given outstanding perform-
 ances in test matches of recent
 years. The cricketers will be in
 the West during the first two weeks
 of August and will play matches in
 Winnipeg, Regina, Moose Jaw,
 Yorkton, Saskatoon, Edmonton
 Calgary and Vancouver.

Mountain View Notes

Last week we commemorated the
 battle of St. Julien, (April 22nd) in
 which the noted "Fighting Tenth"
 Battalion took part early in 1915.
 To those who remain, and to those
 who passed on and lie peacefully in
 Flanders Fields, these few lines are
 dedicated.

TO THE ORIGINAL TENTH.
 Sixteen years ago today,
 The gallant Tenth fought in noble
 fray;

Not many are left to tell the tale
 Of the odds endured, the foe to assail.
 The Noble Tenth you were well
 named,

And at St. Julien you became world
 famed;

One noble leader, Colonel Boyle
 Sleeps peacefully 'neath Flanders
 soil.

Others of you bear wounds for life,
 Which you gained in that bloody
 strife;

To you we lift our hearts today
 And shall look up to you always.

—L.G.A.

Tight Fit But Paint Untouched

Residents of Panama Canal
 Zone had their blindest thrill
 since the "big ditch" was finish-
 ed when the Canadian Pacific
 liner "Empress of Britain" passed
 through the canal in April.
 As the largest vessel ever to nav-
 igate the canal the Empress re-
 ceived unusual attention. In fact
 as far as canal officials were
 concerned, she was viewed with
 farrowed brows. The "Empress"
 crew, if they wanted to, could have
 jumped aboard her, so tightly
 did she fit.

Patented brown marked Chief
 Officer, W. G. Buak-Wood, R.N.R.,
 of the Empress of Britain. As
 the "state" he is responsible for
 her gleaming white painted sides

and hulls were freely offered that
 he would have to put men over
 the side when she reached Cristobal
 to re-paint. Scotchmen
 amongst the 481 passengers cov-
 ered every bet—they had faith in
 the Scottish caution of Com-
 mander R. G. Latta, her commander.

It was a tight fit, but never a
 scratch of paint!
 The photograph shows the
 Empress of Britain entering the
 Pedro Miguel lock. Her pas-
 sengers crowded the decks to
 watch the spectacle and no in-
 teresting was this feat of nav-
 igation that Chief Steward Frank
 Moss complained that for the first
 time in four and a half months
 they forget to eat!
